A365 equipment import management functionality coverage

Import management

Multiple variety management

Handle diverse equipment makes, models, and configurations effectively.

Warranty tracking

Streamline warranty management for equipment and machinery.

Logistics mastery

Effectively control the shipment of equipment and machinery.

Equipment transfers

Facilitate the smooth transfer of equipment between locations.

Claims management

Handle both inbound and outbound claims with precision.

Payment automation

Automate the processing of claim payments for efficiency.

Dealer approvals

Efficiently handle dealer pre-work approvals and processes.

Parts classification

Classify parts efficiently with advanced classification tools.

Supersession management

Handle multi-level parts supersessions with precision.

Returns efficiency

Manage parts refunds and advanced returns with ease.

Accessory control

Manage equipment accessories and attachments with precision.

Service contracts

Simplify service agreement management for seamless maintenance operations.

Quality inspection

Conduct arrival inspections to ensure equipment quality standards.

Vendor relations

Streamline vendor relationships and communication seamlessly.

Automated validation

Automatically validate claims for accuracy and efficiency.

Claim history

Maintain a detailed history of warranty claims for reference.

Claim analytics

Gain insights through comprehensive warranty claim analytics and reporting.

Order handling

Streamline parts orders and distribution for quick processing.

Inventory tracking

Track inventory in real-time for accurate management.

Dealer access

Offer a dedicated dealer portal for streamlined information access.

Price management

Efficiently oversee equipment sales pricing and variations.

Bulk procurement

Manage bulk equipment purchases and logistics efficiently.

Consignment handling

Manage consignment stock with precision and ease.

Data insights

Gain valuable insights through comprehensive procurement data and analytics tools.

Workflow efficiency

Streamline claims workflow and approvals for quick processing.

Recall management

Effectively manage OEM bulletins and equipment recalls.

Integration framework

Seamlessly integrate claims into your workflow for efficiency.

Supplier catalogs

Effectively manage supplier catalogs and part sourcing.

Serialized inventory

Utilize serialized inventory tracking for precision and control.

Incentive programs

Implement dealer incentive programs seamlessly for motivation and growth.
