## Rental management

### Rental contracts—Creation & management

Streamline the process of creating and managing digital rental contracts, ensuring clear terms and conditions.

### Rental equipment availability tracking

Real-time visibility into equipment availability to prevent conflicts and efficiently manage rental bookings.

### Equipment reservations & allocation

Enable seamless customer reservations and ensure optimal allocation of equipment resources.

### RPO

Offer a Rent to Purchase option (RPO), allowing customers to transition from renting to ownership seamlessly.

### Periodic invoicing & usage-based billing

Simplify billing with automated periodic invoicing based on rental terms and usage.

### Insurance/damage waiver

Provide insurance and damage waiver options for rentals as well as track customer's own insurance for customer peace of mind.

### Rental pricing management

Easily configure and manage rental pricing based on various factors, ensuring accurate rates.

### "Best price" automatic re-calculation

Automatically re-calculate charges to offer customers the best available price based on rental changes.

### Rental-related charges

Manage additional charges such as delivery fees, fuel surcharges, and other relevant costs.

### Customer calendars vs. chargeable days

Align customer rental periods with actual chargeable days, ensuring accurate billing.

### Transfer requests & transfers

Facilitate equipment transfers between different locations or projects seamlessly.

### Replacement requests/replacements

Manage equipment replacement requests efficiently to minimize downtime for customers.

### Rental payment processing

Streamline rental payment processing with secure and convenient payment options.

### Re-rent/Cross-rental processing

Manage re-rent and cross-rental scenarios for optimized equipment utilization.

### Wet & dry hire management

Manage wet and dry hire scenarios, with or without operators and operational cost coverage such as fuel.
